

FOAM ROLLER

Full body

The foam roller will help ease muscle tension by releasing the tight fascia that surrounds the muscle tissue. Use the foam roller before and after workouts or any other exercise activity. Below are pictures of the different parts of the body to “roll out”.

Calves

Toes out

Toes in

Cross your ankles

Hamstrings

Glutes / Buttocks

Periformis

Put your foot on top of your thigh and roll on the glute of the leg that's bent

Quads / Top of thighs

Hip flexors / front of hip

IT Band

Mid & upper back

Lats
